I have a passion for learning new technologies and using them to create innovative solutions in all things tech. My main motivation is to be very knowledgeable in my craft, with a strong foundation in Python, Django, Docker, SQL/SQLite, HTML, CSS, Bootstrap, Sphinx, and Git and more. Adept at creating and deploying web applications, with a focus on clean and efficient code. Eager to contribute technical skills and passion for problem-solving to a dynamic software development team.

## TECHNICAL EXPERIENCE

---

### OUTLIER AI

12/2024 -

Worked as a freelance (Independent contractor) AI trainer/ programmer on various projects. I Generate complex code prompts for model failure. Evaluate and improve the model's response to the prompt with more accuracy and adherence to the prompt's instructions and constraints.

### HYPERIONDEV, Software Engineering Bootcamp

12/2023 - 06/2024

The bootcamp aims to introduce and develop Python and machine learning knowledge in students by completing practical challenges and projects. <https://www.hyperiondev.com/portfolio/CC23020006387/>

- o Maintained and achieved a 99% performance rating during a fully remote software engineering bootcamp.
- o Learnt Python programming within six months, enhancing coding skills and efficiency in data manipulation and analysis.
- o Maintained consistent productivity and high-quality code during a six-month remote software engineering bootcamp.

## PROJECTS

---

### Personal Portfolio Website

- o Developed a personal portfolio website that displays my skills, certifications, qualifications, education, work experience and projects and contact information. Designed with Bootstrap to have user-friendly navigation, built to be responsive on all devices. <https://notchxrles.github.io/My-Website/>

### Currency Converter Webpage

- o Developed a responsive currency converter web application with support for multiple currencies, built using HTML, Tailwind CSS, and JavaScript. Integrated real-time exchange rates via Exchange-API to provide accurate conversions. Deployed the project on GitHub Pages for public access <https://notchxrles.github.io/Forexa-Currency-Converter/>

### Travel Destination Platform

- o Developed a fully functional travel destination website using Django and Bootstrap. Implemented secure user authentication, resulting in a 20% increase in user engagement and utilized Docker for containerization, reducing deployment time by 30%. <https://github.com/NotChxrles/travel-website>

## ACCOMPLISHMENTS

---

- o Developed a personal portfolio website using HTML, CSS, and Bootstrap, showcasing who I am.
- o Integrated SQL/SQLite for efficient data management retrieval in one of my projects resulting in a 25% improvement in data access speed.

## TECHNICAL SKILLS
